

WELCOME TO HEALTH CARE ANALYTICS

We are the blooming developers

Our team ID is PNT2022TMID28983

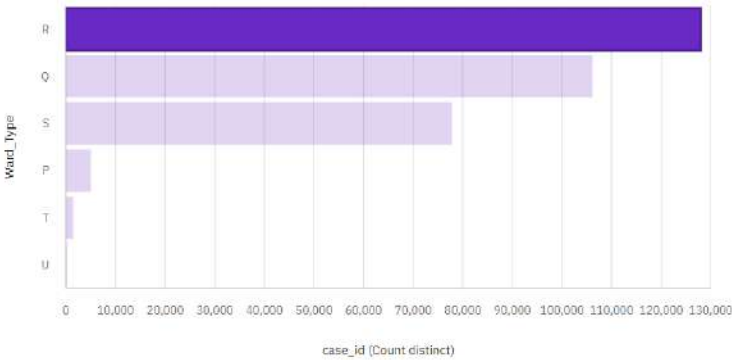

we are introducing to our project's final review for "Analytics for Hospital and Health Care Data".

Introduction

Recent covid-19 pandemic has increased the most overlooked areas to focus on healthcare management. While the health care management has various use case for using data science, patient length of stay in one critical parameter to observe and predict one wants to improve the efficiency of the health care management in a hospital. This parameter helps hospitals to identify patients of high LOS-risk (patients who will stay longer) at the time of admission. Once identified, patients with high LOS risk can have their treatment plan optimized to minimize LOS and lower the chance of staff/visitor infection. Also, prior knowledge of LOS can aid in logistics such as room and bed allocation planning. The goal is to
